

NextGen Brief will be added to “IFR Tools for VFR Pilots” seminar

If you've spent any time at all flying in Hawaii, you know how deadly over-water night operations can be. This vital training will improve your chances of survival, enhance your piloting techniques and increase your confidence when encountering marginal or deteriorating weather conditions. Whether flying “VFR on Top”, over mountainous terrain or water environments at night; what “IFR tools” and techniques do seasoned pilots employ to fly safely when more challenging atmospheric conditions persist. This interactive briefing is beneficial for students and any pilot skill level.

Directions: Maui Aviators near OGG Airport Fire Station

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the “Contact Information” area of the meeting/event notice. Note that two weeks is usually required to arrange services.
